

Do you have classes for NanoFlex?

Classes are held at tradeshow events and are also a part of our CMP curriculum. We also have an on-line video and will have an on-line step by step class coming soon.

Where can I purchase NanoFlex?

Goldwell New York stores or sales representatives.

Can I buy the products separately or do I have to purchase the kit?

You can buy everything individually or in a kit.

How should I charge for NanoFlex?

Cost per service depends on how extensive the re-build is. We suggest anywhere from \$20 to \$60 depending on whether you are doing an overlay or a total reconstruction. Price according to service and time.

Will products adhere to the skin?

NanoFlex will not stay adhered to the skin. There needs to be a small portion of nail for the product to adhere to.

How many applications will I get out of the kit?

The full-size kit: You should get 70 to 80 applications depending on how much gel you are using per rebuild.

Sample kit: 6 to 10 applications.
